Industrial Indoor and Outdoor Applications

We welcome the biggest, most demanding, and most complex projects.

There's no substitute for

## Experience

**The FCP Advantage:** At the core of our guardrails is Allied Tube's exclusive Gatorshield® galvanized tubing—the premier product on the market for superior strength and corrosion protection. This high-tensile steel tubing is high-frequency welded and cold-formed, a process that enhances its physical properties to withstand the toughest conditions, indoors and out.

**Modular Integration:** Seamlessly works with our FreeSpace™ Mezzanine systems and ConnectRite™ building components for a fully integrated solution.

**Architectural Applications:** Beyond the factory floor, FCP delivers high-end architectural guardrails that combine safety with sophisticated design. Perfect for commercial spaces, public access walkways, and architectural projects, these systems provide code-compliant protection without compromising on aesthetics.
