Material Handling Solutions

Increase Floor Space and Maximize Facility Efficiency

Since 1982, FCP has been a material handling industry leader in custom structural solutions for manufacturing, processing, warehousing, and distribution. From our signature modular FreeSpace Mezzanines™ and conveyor supports to OSHA-compliant safety stairs and equipment platforms, we design structures that maximize your square footage and optimize operational performance.

Take your facilities operation to the next level.

Explore real-life FCP case studies that demonstrate how facility floor space and operational challenges were transformed into success stories.

Our experience means a better one for you!

Let us show you how we expedite the permit process and reduce labor costs!

MEZZANINES

Creative Steel Solutions

For over 40 years, FCP Mezzanines has stood at the forefront of industrial mezzanine and custom steel platform design. Our dedicated team of engineers brings unmatched expertise to every project, crafting innovative solutions to even the most complex projects.

We welcome the biggest,
most demanding, and most
complex projects.

There's no substitute for **For Experience**

When you purchase a custom steel mezzanine or platform structure from FCP, you also receive the benefit of knowing that FCP proprietary Free-Space Mezzanines™ modular system has been fully tested, approved, and adopted into current building codes. FCP's ConnectRite™ beam-to-column connection system provides approved lateral force resistance for seismic and wind forces which assures there will be no time wasted obtaining a building permit. In fact, it is the first moment-resistant, bi-directional rigid frame system approved by the American Iron and Steel Institute (AISI), adopted by the IBC, CBC, and the American Society of Professional Engineering (ASPE). When experience counts, count on FCP, the innovation leader in modular mezzanine technology.
